9 August 1984

MEMORANDUM FOR: Deputy Director for Administration

FROM: Daniel C. King
Director of Logistics

SUBJECT: Report of Significant Logistics Activities
for Period Ending 9 August 1984

1. Progress Report on Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

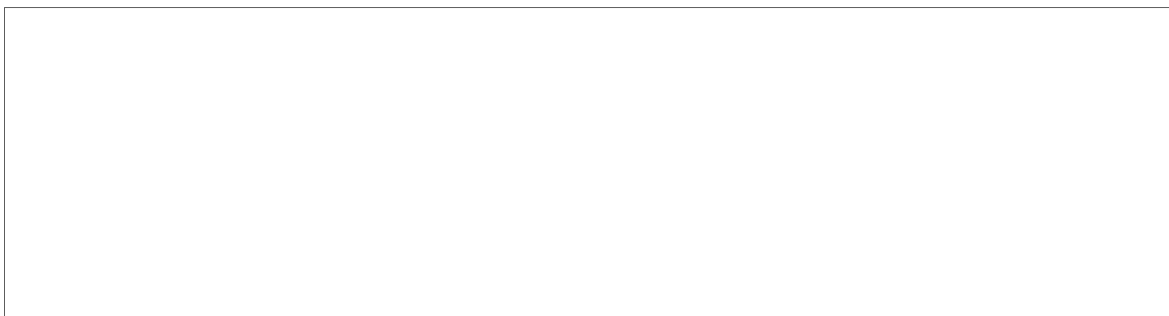

2. Events of Major Interest that have Occurred During the Preceding Week:

a. New Building Project: On 7 August 1984, the New Building Project Office staff briefed the Deputy Director for Science and Technology (DDS&T) on an alternative proposal on the block planning for the new building. On 9 August, the DDS&T office directors will receive the same briefing.

d. Briefing of Office of the Joint Chiefs of Staff Personnel: On 6 August 1984, the Director of Logistics briefed Major General Wesley Rice, USMC, Joint Special Operations Agency, Office of the Joint Chiefs of Staff (OJCS), and senior members of his staff. Major General Rice is responsible for advising the Joint Chiefs of Staff in all matters pertaining to special operations and related military activities, including national strategy, planning, programming, budgeting, resource development, and allocation, and deployment of forces. Although each of the military focal point offices operate independently, they are all subject to OJCS policies and ground rules formulated by Major General Rice's office.

25X1 Hamilton (BAH) will now proceed with the development of software for this first aspect of LIMS - Electronic Requisitioning - which is scheduled to become operational in February 1985. Now that BAH is aware of what is required, the LIMS team will concentrate on the numerous details that must be worked out to ensure that LIMS is properly introduced.

i. VEPCO Substation Failure: On Saturday morning, 4 August 1984, the VEPCO transformer supplying electrical service to the McLean area failed. The Fairfax County Fire Department was summoned to the area as a precautionary measure. The damaged transformer was left out of service after the McLean load was transferred to other transformers in the yard.

VEPCO's corrective action created an unbalanced condition within our distribution system which required the use of one of the emergency generators to compensate and prevent a partial power outage of the powerhouse. The emergency generator was on line until after 1730 hours on 6 August 1984.

A VEPCO representative advised that the current situation could last between 3 and 6 weeks depending on the availability of parts to repair the transformer. The Engineering and Construction Branch, HOME/OL, is studying alternative solutions to the unbalanced condition which would not require running a generator continuously during peak demand hours.

25X1 The electrical service to the Headquarters Compound was not interrupted due to this situation.

25X1 j. Hydraulic Barricades: Installation of the second hydraulic barricade at the Route 123 entrance to the Headquarters Compound has begun.

Daniel C. King *for*.
